IRCAD, a global leader in surgical training, has established its presence in India at the Mohak Bariatrics and Robotics center, situated within the Sri Aurobindo Institute of Medical Sciences campus. This milestone marks a new era in surgical training infrastructure, bringing a world-class center to the heart of India, dedicated to providing tailored training across multiple specialties. It is the culmination of Dr. Mohit's long-held vision to create a premier institute that empowers surgeons to excel and deliver

exceptional surgical outcome. The institute will offer comprehensive programs throughout the year, covering various surgical specialties. A detailed calendar of events will be regularly updated on the IRCAD India website. Furthermore, the state-of-the-art Wet Lab at IRCAD India offers a unique opportunity for surgeons to gain hands-on experience under the mentorship of some of the world's foremost surgical educators.

At IRCAD India, we recognize the pivotal role of artificial intelligence in shaping the future of healthcare. We believe that young surgeons and physicians must be well-versed in the latest technologies, including AI, to deliver optimal patient care and stay ahead in their fields. Through our specialized training programs, we ensure that our participants are well-prepared to harness the power of AI in their practice.

Leading the charge at IRCAD India is Dr. Mohit Bhandari, serving as the President of IRCAD India. Under his guidance and expertise, IRCAD India continues to push boundaries and set new standards in surgical education. Professor Jacques Marescaux, the President of Global IRCAD, provides invaluable leadership and support to our institute, further cementing our position as a global center of excellence in minimal access surgery training.

Join us at IRCAD India and embark on a transformative journey towards surgical excellence, innovation, and mastery. Experience the future of surgery today with IRCAD India – Where Excellence Meets Innovation!
