OBJECTIVES

Provide the basics of Laparoscopy in Gynaecology – Ergonomics, Instrumentation and skills required for progress in laparoscopic surgeries.

- Teach Surgical anatomy the laparoscopy way
- Teach the technical steps used for advanced laparoscopic procedures
- Highlight the potential complications and steps to prevent them
- Hands on live tissue (animal) to give participants the technical knowhow of navigating through tissues during surgery

WHO SHOULD ATTEND

- Every Young Gynaecologist who aspires to do modern Gynaecological surgery.
- To improve and master further skills to those already performing basic laparoscopic surgery in Gynaecology
